CONNECTED BY DESIGN

One platform. Your next move.

Connect your showroom, inventory workflow, and vehicle data. Give your team more room to focus on customers.

FOR DEALERSHIPS

A complete digital showroom

From the first inventory search to a test-drive request, give shoppers a clear next step. Present your vehicles and manage inventory from one connected workspace.

FOR DEVELOPERS

Vehicle data for your application

Put VIN decoding to work in your existing application with structured responses and a documented API. Your team need not become walking vehicle encyclopedias.

Managed service. Practical support.

Dealer website plans include hosting, maintenance, and support. You sell cars. A second career in website maintenance is optional.

BUILT AROUND YOUR DEALERSHIP

autodealer.dev

LET'S TALK ABOUT YOUR DEALERSHIP

See your next showroom.

Tell us about your inventory, your brand, and the experience you want customers to have. We can walk through the tools that fit your dealership's daily work.

REQUEST A PERSONAL DEMO

See shopper actions, inventory tools, and VIN-powered details in context. Bring your questions. No need to bring the whole car lot.

YOUR DIGITAL SHOWROOM

Your next sale starts online.

Dealer websites. Inventory tools. Vehicle intelligence. Connected.

REAL PLATFORM. REAL INVENTORY.

Show every vehicle at its best.

Give shoppers a clear path from inventory browsing to contacting your dealership.

Let the cars do the talking.
We'll handle the website.

WEBSITES / INVENTORY / VIN DATA

DIGITAL SHOWROOM

A showroom worth exploring.

Give shoppers an inviting place to find their next vehicle and take the next step.

Vehicle pages with clear next actions

Make discovery easy

Searchable inventory and useful filters help shoppers find the right fit. Save the treasure hunts for the glove box.

Move interest forward

Pair photo galleries and vehicle details with financing applications, contact options, and test-drive requests.

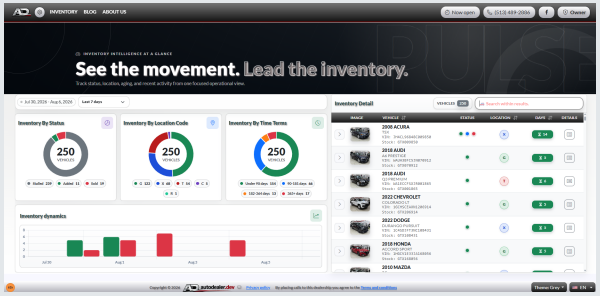

Make it your dealership

Build familiarity with About, Staff, Testimonials, and Contact pages. Put real people behind the inventory.

INVENTORY OPERATIONS

Your inventory. Under control.

Bring everyday inventory work into one focused administration workspace.

Inventory visibility at a glance

Less typing. More selling.

Create and edit inventory with VIN-assisted vehicle details. Your keyboard has already worked enough overtime.

Keep inventory moving

Import from Frazer and compatible sources. Preview changes and review additions, updates, and sold vehicles.

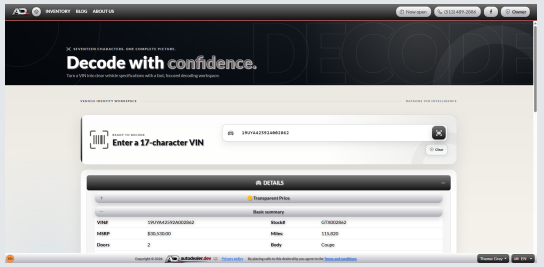

See the bigger picture

Manage photos, publishing, inventory history, analytics, and printable QR materials in one workspace.

VIN INTELLIGENCE

Every vehicle, better understood.

Turn a 17-character VIN into useful vehicle details for your team and applications.

VIN-powered vehicle information

Seventeen characters. Plenty to say.

Decode year, make, model, trim, body style, and drivetrain. Small input. Much better conversation.

Go beyond the basics

Access specifications, equipment, colors, warranties, and fuel economy data to add context to vehicle listings.

Use it your way

Receive JSON or XML for integrations, or HTML for a vehicle report. Your format. Your workflow.

API access available separately.

One connected platform. Built around your dealership.
